

Principal Operational Technology Consultants

About DGA Consulting

DGA Consulting is a specialist operational technology and utility strategy consulting company consisting of talented and experienced professionals who collaborate to solve client challenges across the power, water, gas and renewables sectors.

DGA has gained a successful track record and has a growing reputation in the Australia/NZ and South East Asian markets. We are now keen to expand our coverage and recruit additional consultants to assist us in the delivery of our services and to further grow our client base.

Responsibilities

DGA Consulting wishes to identify suitable candidates for roles as Principal OT Consultants in a full-time, part-time or contract basis. Successful candidates will be required to perform a broad range of functions within the business including:

- Consulting services in OT project design, procurement, and implementation
- Provide specific advice on the best use of operational technology
- Development of proposals (including technical and commercial aspects)
- Client meetings and sales presentations
- Participation at relevant industry conferences / events
- Development of quality documentation to support DGA's services

The role is remote (work from home and client sites) and the consultants can be based in any major city in Australia.

Candidate Requirements

Candidates will have experience in the utilities sector, and experience with OT systems and their associated environments.

Key skills and experience include:

- Experience in the planning, design, procurement, implementation and operation of OT Systems including:
 - gathering of business requirements,
 - development of technical specifications,
 - development of commercial / contractual tender documentation, and
 - evaluation of tenders and the management of ensuing projects
- OT project experience and/or OT program management experience
- Degree qualified in Engineering or Technology disciplines

- Strong verbal, written and presentation skills (strong spoken and written English language skills are essential)
- Knowledge of utility sector trends and emerging markets
- Self-starter, able to perform with a high level of autonomy
- The ability to work in a collegiate environment
- A willingness to travel as required
- It is desirable for candidates to have experience working for a utility company at a senior or management level, and to have relationships within the utility sector
- It is desirable for candidates to have facilitation and advisory skills in the delivery of consulting projects
- Australian citizen or permanent resident

Why join DGA Consulting?

DGA Consulting was set up to allow employees to achieve a positive work-life balance and to move away from the negative and ineffective practices of large corporate environments. We have developed a culture based on working within a collegiate environment where collaboration, respect, integrity and high-quality work is valued.

We offer the following benefits from working with DGA Consulting:

- The opportunity to work on challenging projects within the geography of our target markets, and to operate with a high level of independence
- Work from home (and client sites as required)
- Work within a team-oriented environment where talented people collaborate to achieve the best results for our clients
- Receive a competitive remuneration package with bonuses for good company performance
- Option for future ownership in the business for successful and proven employees
